

(Dated: spring 2010)

Publication list of Reinhold Oppermann

1. *E. Nakhmedov, R. Oppermann*
Critical disorder effects in Josephson-coupled quasi 1D superconductors,
Pis'ma v ZhETF, vol. 91, iss. 11, pp.639-645 (2010)
2. *E. Nakhmedov, R. Oppermann*
Disorder-driven superconductor-normal metal phase transitions in quasi 1D organic conductors,
Phys. Rev. E 81, 134511 (2010)
3. *R. Oppermann*
Universality class of replica symmetry breaking (invited talk at workshop Random Matrices and Integrability: From Theory to Applications),
Proceedings of the research workshop of the Israel Science Foundation, Yad Hashmona/Jerusalem (Israel) (2009)
4. *R. Oppermann, M.J. Schmidt*
Formation of full replica symmetry breaking as a critical phenomenon: RSB-universality class of the SK spin glass versus KPZ growth, Proceedings of conf. Modeling and simulation of new materials, 10th Granada lectures, Granada (Spain), p.231, AIP Conf. Publ., Melville, New York (2009).
5. *R. Oppermann, M.J. Schmidt*
Universality class of replica symmetry breaking and the low-temperature fixed-point order function of the Sherrington-Kirkpatrick model
Physical Review E 78, 061124 (2008), (arXiv:0803.3918)
6. *M.J. Schmidt, R. Oppermann*
New technique for replica symmetry breaking with application to the SK-model at and near T=0
Physical Review E 77, 061104 (2008), (and arXiv:0801.1756)
7. *R. Oppermann, M.J. Schmidt*
Construction and purpose of an effective field theory of frustrated magnetic order
SFB 410-report, Würzburg (Feb 2007)
Phys. Stat. Sol.(c)4, 3347 (2007)
8. *M.J. Schmidt, K. Pappert, C. Gould, R. Oppermann, L.W. Molenkamp*
Bound hole states in a ferromagnetic (Ga,Mn)As environment
Physical Review 76, 035204 (2007)
9. *R. Oppermann, M.J. Schmidt, D. Sherrington*
Double criticality of the Sherrington-Kirkpatrick model at T=0
Physical Review Letters 98, 127201 (2007)
10. *M.J. Schmidt, R. Oppermann*
The $\exp C$ -method for almost saturated frustrated glassy order
Würzburg preprint (2007)
11. *R. Oppermann, M.J. Schmidt, D. Sherrington*
Mixed spectra and the two-critical-point structure of the T=0 SK-model
cond-mat/0608581
12. *R. Oppermann, D. Sherrington*
Scaling and Renormalization Group in Replica Symmetry Breaking space: evidence for a simple analytical solution of the Sherrington-Kirkpatrick model
Physical Review Letters 95, 197203 (2005)

13. *R. Oppermann, D. Sherrington, M. Kiselev*
Modulated replica symmetry breaking schemes for antiferromagnetic spin glasses
Eur. Phys. J. B37, 187 (2004)
14. *M. Bechmann, R. Oppermann*
Dynamical solutions of a Quantum Heisenberg spin glass model
Eur. Phys. J. B41, 525 (2004)
15. *M. Bechmann, R. Oppermann*
Dynamical CPA-approach to an itinerant fermionic spin glass model
Eur. Phys. J B35, 223 (2003)
16. *R. Oppermann, D. Sherrington*
Fermionic Sherrington-Kirkpatrick models with Hubbard interaction: Magnetism and electronic structure,
Physical Review B67, 245111 (2003)
17. *M. Kiselev, K. Kikoin, R. Oppermann,*
Ginzburg-Landau functional for nearly antiferromagnetic perfect and disordered Kondo lattices,
Physical Review B65, 184410 (2002)
18. *M. Kiselev, R. Oppermann*
Screening effects in Kondo lattices with quenched disorder,
Physica B 312-313, 167 (2002)
19. *E. Nakhmedov, M. Kumru, R. Oppermann*
PRL85-reply
Physical Review Letters 87, 239704 (2001)
20. *M. Kiselev, H. Feldmann, R. Oppermann*
Semi-fermionic representation of SU(N)-generators
Eur. Phys. J. B22, 53 (2001)
21. *M. Kiselev, R. Oppermann, D. Sherrington:*
Competing phases in a dilute magnetic semiconductor layer model with magnetic polaron formation
Festschrift zum 60. Geburtstag von Franz Wegner Heidelberg (Juni 2000)
22. *M. Kiselev, R. Oppermann*
Schwinger-Keldysh semionic approach for quantum spin systems
cond-mat/0008060
Physical Review Letters 85, 5631 (2000)
23. *H. Feldmann, R. Oppermann:*
The fermionic Ising spin glass and the Ghatak-Sherrington model
J. Phys. A: Math Gen. 33, 1325 (2000)
24. *M. Kiselev, R. Oppermann*
Spin glass transition in Kondo lattices with quenched disorder
JETP Letters 71, 210 (2000)
25. *H. Feldmann, R. Oppermann:*
Selforganized 3-band structure of the doped fermionic Ising spin glass
Physical Review B62, 9030 (2000)
26. *M. Kiselev, R. Oppermann:*
Effective bosonic field theory for Kondo lattice models: magnetic instability and effects of disorder
Würzburg-preprint 7/1999
27. *E. Nakhmedov, H. Feldmann, R. Oppermann, M. Kumru:*
Effects of substitutional impurities on the electronic density of states and conductivity of crystals with half filled band
Physical Review B62, 13490 (2000)

28. *H. Feldmann, E. Nakhmedov, R. Oppermann:*
Distribution function of the local density of states of a one-channel weakly disordered ring in an external magnetic field
Physical Review B62, 2401 (2000)
29. *E. Nakhmedov, M. Kumru, R. Oppermann:*
Density of states of disordered two-dimensional crystals with half-filled band
Physical Review Letters 84, 3930 (2000)
30. *E. Nakhmedov, H. Feldmann, and R. Oppermann:*
Aharonov-Bohm effect in one-channel weakly disordered rings
Eur. Phys. J. B 16, 515 (2000)
31. *R. Oppermann and H. Feldmann:*
Pseudogaps, charge band, and superconductivity in the Parisi solution of fermionic spin glasses at arbitrary filling
Proceedings of the Int. Conf. on Electronic Crystals, ECRYS-99, Nice/La Colle sur Loup, june 1999
32. *H. Feldmann and R. Oppermann:*
Random magnetic interactions and spin glass order competing with superconductivity: Interference of the Quantum Parisi Phase
cond-mat/9812008,
European Physical Journal B10, 429-445 (1999)
33. *B. Rosenow and R. Oppermann:*
Metal insulator transitions in randomly interacting systems
Univ. Köln-preprint, september 1998
34. *H. Feldmann and R. Oppermann:*
Competition between spin glass order and strong coupling superconductivity in a single-species fermion model
cond-mat/9809001
Eur. Phys. J. B10, 429 (1999)
35. *M. Rehker and R. Oppermann:*
Fermionic TAP equations,
cond-mat/9808239 and
Journal of Physics: Condensed Matter 11, 1537 (1999))
36. *R. Oppermann and B. Rosenow:*
Studies of the phase diagram of randomly interacting fermionic systems,
cond-mat/9803249
37. *R. Oppermann and B. Rosenow:*
Parisi - Symmetry of the Many - Body Quantum Theory of randomly interacting fermionic systems,
cond-mat/9803239
Physical Review B60, 10325 (1999)
38. *R. Oppermann and B. Rosenow:*
Low energy excitations of fermionic spin glasses and replica-symmetry breaking,
Europhysics Letters 41, 525 (1998)
39. *Jun Li and R. Oppermann:*
Novel spin-wave dispersion in the intermediately-coupled Hubbard model at half-filling,
Würzburg preprint (1998)
40. *R. Oppermann and B. Rosenow:*
Magnetic Gaps related to Spin Glass Order in Fermionic Systems,
SFB410 preprint,
cond-mat/9704047,
Physical Review Letters 80, 4767 (1998)

41. A.L. Chudnovskiy, R. Oppermann, B. Rosenow, D.R. Yakovlev, U. Zehnder, and W. Ossau:
Interaction of Exciton Magnetic Polaron with Spin Glass Order in (Cd,Mn)Te,
Physical Review B55 10519 (1997)
42. R. Oppermann and B. Rosenow:
Fermionic Quantum Spin Glasses,
Proceedings of the XIV Sitges Conference on Complex Behaviour of Glassy Systems, Sitges, 1996,
Lecture Notes in Physics Vol.492, p.266 (1997), (Springer Heidelberg)
43. B. Rosenow and R. Oppermann:
Tricritical behaviour of fermionic Ising spin glasses with charge fluctuations,
Physical Review Letters 77, 1608 (1996)
44. A.L. Chudnovskiy, B. Rosenow, R. Oppermann, D.R. Yakovlev, U. Zehnder, and W. Ossau:
Effect of spin glass formation on exciton magnetic polaron in (Cd,Mn)Te,
Acta Physica Polonica A 90, 755 (1996)
45. R. Oppermann, M. Binderberger, and B. Rosenow:
Renormalization of metallic spinglass transition at $T = 0$ and generalized quantum dynamics
inv. contrib. to the Saclay-conf.on
Recent Advances in the theory of disordered systems, juillet 1995, published in
Journal de Physique I 6, 60 (1995)
46. B. Rosenow, R. Oppermann, and M. Binderberger:
Renormalization group analysis at the lower and upper critical dimension for the localization transition in a disordered superconductor,
invited contribution to the Saclay conference on
Recent Advances in the theory of disordered systems, juillet 1995, published in
Journal de Physique I 6, 61 (1995)
47. S. Sachdev, N. Read, R. Oppermann:
Quantum field theory of metallic spin glasses,
Yale-report (1994), cond-mat/9504036, and
Physical Review B52, 10286 (1995)
48. R. Oppermann and M. Binderberger:
Solutions for the $T = 0$ quantum spin glass transitions in a metallic model with spin-charge coupling,
Annalen der Physik 3, 494 (1994)
49. J. Stein and R. Oppermann:
One loop result for the Bogoliubov-Anderson mode of the superconducting strong coupling attractive Hubbard model,
Physics Letters A189, 370 (1994)
50. O. Veits, R. Oppermann, M. Binderberger, and J. Stein:
Extension of the Popov-Fedotov method to arbitrary spin,
Journal de Physiques I France 4, 493 (1994)
51. R. Oppermann and A. Müller-Groeling:
From localized to itinerant spin glasses: Grassmann field theory and mean field solutions,
Nuclear Physics B401, 507 (1993)
52. R. Oppermann and A. Müller-Groeling:
Field theoretic derivation and extension of Sherrington-Kirkpatrick and Parisi spin glass solution,
Physics Letters A168, 75 (1992)
53. J. Stein and R. Oppermann:
 η -pairing superconductivity in the strong coupling negative U Hubbard model,
Physical Review B46, 8409 (1992)

54. R. Oppermann and J. Stein:
A spindependent Popov–Fedotov trick and a new loop expansion for the strong coupling negative U Hubbard model,
Zeitschrift für Physik B83, 333 (1991)
55. V.E. Kravtsov and R. Oppermann:
Nonlinear σ –model for localization in superconductors: role of order parameter phase fluctuations,
Physical Review B43, 10865 (1991)
56. S. Schohe, R. Oppermann, and W. Hanke:
Matrix field theory for disordered local pairing superconductors with two glass order parameters and spin–flip pairbreaking processes,
Zeitschrift für Physik B83, 31 (1991)
57. R. Oppermann:
Anderson localization problems in gapless superconducting phases, Proceedings des workshops *Mesoscopic fluctuations and Anderson localization*, Braunschweig, january 1990 and
Physica A 167, 301-312 (1990)
58. R. Oppermann:
Functional integration method for the Hubbard model with large negative U and other local pairing models,
Zeitschrift für Physik B75, 149 (1989)
59. R. Oppermann:
Properties of microscopic superconducting glasses, Proceedings of the International Conference on *HTSC – M²S* (Interlaken 1988), and
Physica C 153-155, 711 (1988)
60. R. Oppermann:
The electronic specific heat of superconducting glasses, CEN Saclay report (1987) and
Solid State Communications 65, 1391 (1988)
61. R. Oppermann:
Pseudogap in the electronic density of states of superconducting glasses,
Zeitschrift für Physik B70, 49 (1988)
62. R. Oppermann:
Solution of selfconsistent equations for superconducting glasses: a new universal ratio, critical exponent $\beta = 1$, and behaviour in magnetic fields,
Zeitschrift für Physik B70, 43 (1988)
63. R. Oppermann:
On a quantum field theory of superconducting glasses and other impure superconducting phases,
Zeitschrift für Physik B68, 329 (1987)
64. R. Oppermann:
Nonlinear sigma model for localization in superconductors, MIT–report (1986) and
Nuclear Physics B280[FS18] 7539 (1987)
65. R. Oppermann:
Symmetries of disorder ensembles with superconducting order, Roma 1 La Sapienza report (1986) and
Europhysics Letters 3, 431 (1987)
66. R. Oppermann:
Interacting disordered systems with more than one order parameter, Proceedings of the International Seminar on Localization in Disordered Systems, Bad Schandau (1986)

67. *R. Oppermann:*
Inhomogeneity correlations (I) in dirty superconductors,
Zeitschrift für Physik B63, 33 (1986)
68. *R. Oppermann:*
Field theoretic formulation and soft modes of dirty superconductors,
Zeitschrift für Physik B61, 89 (1985)
69. *R. Oppermann:*
N orbital models, SFB 123 report August 1984, and in
Proceedings of the LITPIM conference, Braunschweig 1984
70. *R. Oppermann:*
Magnetic field induced crossover in weakly localized regimes and
scaling of the conductivity, SFB 123 report (1984) and
Journal de Physique Lettres 45, L-1161-5 (1984)
71. *R. Oppermann and K. Ziegler:*
Localization by diffusons,
ITP Santa Barbara report (refereed), 2/1984
72. *R. Oppermann:*
Superconductivity and localization in disordered systems:
a local gauge invariant approach,
Journal of the Physical Society of Japan 52, 3554 (1983)
73. *R. Oppermann:*
The Mott Anderson metal insulator transition in n orbital models,
Zeitschrift für Physik B49, 273 (1983)
74. *R. Oppermann:*
Anomalous Stoner enhancements in amorphous systems,
Solid State Communications 44, 1297 (1982)
75. *R. Oppermann:*
Disordered electronic models with electron scattering from ionic spin degrees of freedom,
Progress of Theoretical Physics 68, 1038 (1982)
76. *R. Oppermann:*
Perturbative Einzelteilchen- und Vielteilchentheoretische Beschreibungen von Metall Isolator
Übergängen in ungeordneten Systemen,
Habilitationsschrift, Heidelberg, Oktober 1981
77. *R. Oppermann:*
On effects of electron-electron interactions in disordered electronic systems, in "Disordered systems
and localization",
Conference Proceedings Rom, Mai 1981, Lecture Notes in Physics (Springer Verlag)
78. *R. Oppermann:*
Critical localization behaviour of spindependent ensembles with broken time reversal invariance,
Journal of Physics C14, 3757 (1981)
79. *R. Oppermann and K. Jüngling:*
Determination of universality classes for spindependent ensembles with
time reversal invariance,
Journal of Physics C14, 3745 (1981)
80. *K. Jüngling and R. Oppermann:*
Effects of spin interactions in disordered electronic systems:
loop expansions and exact relations among local gauge invariant models,
Zeitschrift für Physik B38, 93 (1980)

81. *R. Oppermann and K. Jüngling:*
Random electronic models with spindependent hopping,
Physics Letters 76A, 449 (1980)
82. *R. Oppermann and F.Wegner:*
Disordered systems with n orbitals per site: $1/n$ expansion,
Zeitschrift für Physik B34, 327 (1979)
83. *R. Oppermann:*
A microscopic calculation of dynamic critical exponents
for displacive phase transitions,
Zeitschrift für Physik B27, 93 (1977)
84. *R. Oppermann:*
Microscopic $1/n$ expansion for critical dynamics and hydrodynamics near
displacive phase transitions,
Journal of Physics C10, 2547 (1977)
85. *R. Oppermann:*
On $1/n$ expansions for the dynamics of structural phase transitions,
Physics Letters 59A, 165 (1976)
86. *R. Oppermann:*
Feldtheoretische Untersuchungen zur Statik kritischer Phänomene,
Dissertation, Frankfurt am Main, Mai 1975
87. *R. Oppermann and H. Thomas:*
Critical behaviour at the displacive limit of structural phase transitions,
Zeitschrift für Physik B22, 387 (1975)
88. *R. Oppermann:*
Scaling functions of susceptibilities to $O(1/n)$ for n -vector models with axial anisotropy,
Zeitschrift für Physik B20, 405 (1975)
89. *R. Oppermann:*
Wilson expansions for an extended Potts model,
Journal of Physics A8, L43 (1975)
90. *R. Oppermann:*
Change of the order of a phase transition induced by axial anisotropy,
Journal of Physics C7, L366 (1974)
91. *R. Oppermann:*
Cubic against isotropic critical behaviour for long-range interactions,
Journal of Physics C7, L137 (1974)
92. *R. Oppermann:*
Crossover exponent of the anisotropic n -vector model,
Physics Letters 47A, 383 (1974)
93. *R. Oppermann:*
Application of the Abrikosov pseudofermion technique to a homogeneous spin system
Zeitschrift für Physik 259, 285 (1973)
